

An aerial view of a city at night, with light trails from traffic and glowing network connections overlaid. The connections are represented by white arcs and dots, suggesting a global or interconnected network. The city features a mix of high-rise buildings and lower residential structures, with a river or waterway visible in the background.

SIMPLE . SECURE . CONVENIENT

CORPORATE PROFILE

ABOUT US

We are a financial technology payments enabler, offering an advanced, integrated, multi-channel platform. We mainly target corporate bulk payments and collections, digital channels, as well as the operations and technology required for these activities e.g. agency and biometrics.

Our main target markets include *Micro Finance Institutions (MFIs), Savings & Credit Co-operatives (Saccos), Banks, Supply Chain industry, County and National governments, corporates and parastatals.*

We facilitate payments through integration to existing financial platforms e.g. *Banks, Mobile Money, Kenya Interbank Transaction Switch (KITS), Integrated Financial Management Information Systems (IFMIS), e-citizen etc.*

Our technology is device and service provider independent with scalable cross-border interoperable functionalities.

We also seek to create, maintain, analyse and present individual and corporate financial transaction history for use during future financial relations with financial institutions e.g. for loans and other facilities.

VISION

To be the preferred Integration and Digital Payments partner of choice.

CORE VALUES

Simplicity • Honesty • Collaboration •
Innovation • Responsiveness

MISSION

To create a simple, secure, convenient and affordable payment platform that enhances financial transaction penetration through the use of innovative, seamless and straight through interoperable solutions that meet the needs of individuals and corporates within the region.

TARGET MARKET

Our market spans across the financial transfer needs market.

We specialize in these areas:

- Corporate based bulk payments and collections.
- Integration of digital channels
- Creation, analysis and maintenance of customer financial transactional history for usage on furtherance of financial interaction and facilities.
- Extension of the corporate services and operations to agency and customer self-service channels.
- Integrating corporates to financial institutions, and also amalgamating all channels of access for the individuals and recipients of financial transactions.
- Banks, co-operative movements (Saccos) Micro Finance Institutions (MFIs), Supply chain financial transactions and Agency infrastructures form the basis of our solutions.

WHY PAYCONNECT?

At PayConnect, we believe in interoperability.

Our solutions facilitate transactions across banks, mobile networks and cross border.

We pride ourselves in interoperability and device agnostic solutions.

Our solutions are scalable and modular.

We integrate solutions across various institutions creating a payment ecosystem that inter connects corporates, MFI's, Sacco's etc.

At PayConnect, we ease that burden by congregating these channels and removing the hustle from the corporate so that they can concentrate on their core business.

Our solution comes with minimal or no upfront capital outlay.
